Restart and Reentry for 2020-2021:

We are on track to transition to hybrid in-person learning for five special education classes at FLC starting Monday, November 16. This is possible because we have purchased and installed five portable HEPA Air Purifier units for those classrooms. The classes are three pre-school disabled classes (teachers: Spracklen, Barone, Smith), and two self-contained multiple disabled classes (teachers: Pena and Andia). As per our in-school hybrid plan, the classes will alternate on A Day and B day on the early dismissal schedule times, and students will take their related classes (PE, Art, Health, Music, Spanish) virtually on the alternating day they are not in school, or in the afternoon of the day they are in-school.

We are on track to transition to hybrid in-person learning for the rest of the district on Monday, December 14th. We have started the installation of our bipolar ionization units at PAC. When complete and tested, these units will put the district in compliance for HVAC air purification standards established by the Department of Education.

Letters are in the mail today to give parents an opportunity to change the preferences for their students, either to switch to in-school hybrid instruction, or to remain on 100% virtual instruction after December 14th.

Parents who will be returning to in-person hybrid instruction will have to fill out a student health screening form. This will come with information on when to keep a student home (e.g. when ill, when placed in isolation because of COVID positive, or when in quarantine because of close contact exposure to someone who is COVID positive.)
